Text:

This is Neba. Neba is boy. This is Siri. Siri is a girl. This is Tangyie. Tangyie is a man. This is Bi. Bi is a woman. Bi is Tangyie's wife. Tangyie is Bi's husband. Tangyie is the father of Neba and Siri. Bi is the mother of Neba and Siri. They are a family.

Oral Comprehension Questions:

1. Name all the names you have heard in this story.
2. What sex is Neba?
3. What sex is Siri?
4. Whose children are Neba and Siri?
5. Whose father is Tangyie?
6. Who is Bi?
7. How many people are in the family?
8. Who are other members of a family? ? (aunts, uncles, cousins, grandparents etc.)
9. How many people are in your family?
10. How does your family care for you?
11. How do you care for your family?

7. What does your house look like?
8. How many doors does your house have?
How many windows? How many walls?

A Family

Pages: 131-140

Subject:

Citizenship (Human Rights)

Content Objectives:

The pupils will be able to:

- identify their nuclear and extended family members.
- acquaint themselves with the knowledge of their home and family, both nuclear and extended.

English Translation of the Stories	123

Preface

This book is the first in a five series of anthologies for junior primer pupils of the Bafut language. The orthography conforms to the guidelines for General Alphabet for Cameroon Languages as adopted by the National Committee for the unification and harmonization of the alphabets of Cameroon languages. In alignment with the national curriculum, the stories are based on content subject matter for the instruction of science, hygiene, civics, and moral values. The lesson formats adhere to the requisite “Seven Stages of Lesson Development”.

This integrated, leveled curriculum employs a whole language methodology for the teaching of reading, which focuses on comprehension of whole texts. Phonics is another vital component of reading instruction. Accordingly, it is expected that the curriculum will be used in conjunction with the Bafut primer series, which focuses on the phonetic decoding of words. The use of both the leveled content readers and the phonics primers create a balanced literacy approach and thus employ the most effective instructional strategies for the teaching reading. Reading comprehension is a vital component of the curriculum. The questioning strategies are designed to promote higher levels of comprehension and reasoning skills (predicting, applying, analyzing, summarizing, inferring and evaluating).

The United Nations has championed mother tongue education for children of minority language groups. In 1953, UNESCO declared that every citizen has the right to participate in social, economic, political and educational processes in his or her mother tongue. This right was subsequently upheld by the United Nations in 1966 as Article 27 of the “International Agreement on Civil and Political Rights” (Akinnaso 1993). Mother tongue education has repeatedly been shown to be important psychologically since it enhances personal worth through

Content Objectives:

The pupils will be able to:

- greet people at home and at school using their names.
- acquaint themselves with the knowledge of their home.

Text:

Good morning! My name is Mbo. I live in this house. This is the roof. This is the door. This is the floor. These are the walls. These are the windows. This is my house!

Oral Comprehension Questions:

1. What is the girl’s name?
2. How did she greet?
3. Why is it important to greet?
4. Who lives in the house?
5. What elements make up the house?
6. What might be inside the house?

Oral Comprehension Questions:

1. What three things do plants need to grow?
2. What might birds do to the plants' seeds?
3. How do we keep birds from eating the seeds?
4. What might weeds do to the plants?
5. How do we keep weeds from choking the plants?
6. What might insects do to the plants?
7. How can we keep insects from eating the plants?
8. Do you know of other ways to help plants grow?

My House

Pages: 122-130

Subject:

Citizenship (Civics)

validation of the learner's language and culture. It has also been shown pedagogically effective; learners allowed to begin education in their own language quickly grasp the foundational concepts of reading, writing, and numeracy and are more likely to be successful when later they transfer to classrooms where instruction is provided in a second language. The World Bank made the following statement in support of bilingual literacy:

From a purely educational point of view, it now appears demonstrably clear that in the early primary years it is advisable to use mother tongues as instructional languages, even if the ultimate aim is to educate children in the national language. (Sanou 1990:76)

Another benefit of mother-tongue education—cultural preservation—was reaffirmed by the International Conference on Education (Geneva 1992), whose final report included a statement concerning “the right of individuals and various ethnic groups to preserve their cultural identity, of which their language is one of the most important vehicles.” (ICE 1992:4). It is therefore appropriate to provide the Bafut language speakers with the opportunity to learn to read and write in their own language.

The Bafut curriculum, written in tandem with mother tongue speakers, has been carefully designed to make the learning process as easy and as culturally relevant as possible. It is hoped that this curriculum may not only teach young children to read their own language, and thereby improve their academic progress as they learn the national languages, but also contribute to the preservation of the rich linguistic and cultural heritage of Cameroon.

Special thanks are given to the Bafut Language Development Committee.

Schedule for Weekly Instruction for Integrated Reading

MONDAY: Introduction of the Weekly Story

Objective

On Mondays the children will focus on comprehension of the whole text.

Preparation

Read the new story for the week and the comprehension questions. Before school be sure to have a copy of the book for every child.

Lesson Notes

Revision

Talk about the theme of the story they read last week. Ask them to tell what they learned.

Problem

Explain that they will read a new story this week and that they need to focus the story so that they will be able to answer the questions.

Hypothesis

Introduce the theme of the story by talking with the children about the topic. Have them guess what the story will be about.

Research

Give a book to every child and have them find the story for the week. Before reading each page, look at and talk about each picture.

Analysis

Read the story to the children. Encourage them to read along by pointing to the words with their fingers. Ask them if their predictions about the story were correct.

Content Objectives:

The pupils will be able to:

- care for plants and animals.
- develop an awareness and appreciation of plants.
- develop an interest in the growing of vegetables and flowers.
- develop skills in the conservation and protection of plants.
- identify harmful insects.

Text:

Plants need good soil. But plants don't need weeds! Plants need sunlight. But plants don't need birds! Plants need water. But plants don't need grasshoppers! Plants need good soil, sunlight, and water.

Text:

We care for chickens. We care for goats. We care for sheep. We care for dogs. We care for cats. We care for birds. We care for cattle. We care for ducks. We care for pigs. We care for animals.

Oral Comprehension Questions:

1. How do we care for each of the animals?
2. Where do each of the animals live and what do they eat?
3. What animals does your family care for?
4. What shouldn't we do to animals?
5. Act like the animal your teacher names.

What Plants Need

Pages: 112-121

Subjects:

Citizenship (Moral Education)

Science (Environmental Education)

Synthesis

Read the story to the children again. Encourage them to read along by pointing to the words with their fingers.

Evaluation

Orally ask the comprehension questions and have the children talk about the answers. They may need to look at the correct page in the book to formulate their answers.

TUESDAY: Sentences

Objective

On Tuesdays the children will focus on sentence structure.

Preparation

For teaching using the Literacy Ladder:

Before the school day begins, write two sentences from the story onto cardboard strips. You will need to have your scissors with you in class.

For teaching using the Blackboard:

Before the school day begins, write the words for two of the sentences out of order. Be sure the first word of each sentence is written with a capital letter and that there is a full stop at the end of each sentence.

Lesson Notes

Revision

Read the story to the children. Encourage them to read along by pointing to the words with their fingers.

Problem

Explain that they will mix up the words from two of the sentences from the story and then they will need to put the words in the correct order again.

Analysis

For teaching using the Literacy Ladder:

Ask who can read the first word of the first sentence. Cut that word off from the rest of the sentence. Let the child who read the word come up, read it, and hold it for the class to see. Repeat this procedure with every word in the sentence. Once all words are being held by children in the front of the classroom, ask the class to read the entire sentence once.

For teaching using the Blackboard:

Ask individual children to look at the mixed-up sentence and identify the words in the correct order. Correctly write the sentence as the children dictate the words in the correct order. Once the sentence is written correctly, ask the children to read the entire sentence once.

Synthesis

For teaching using the Literacy Ladder

Take all of the words from the children and have them sit down. Put the words onto the literacy ladder in mixed order. Ask individuals to re-order the sentence one word at a time.

For teaching using the Blackboard

Ask individuals to read the sentences in the correct order.

Note: Follow the same procedures for the second sentence.

Evaluation

Point to words for the children to read in random order.

We Care for Animals

Pages: 101-111

Subjects:

Science: (Environmental Education)

Citizenship (Moral Education)

Content Objectives:

The pupils will be able to:

- state, appreciate and develop skills in animal care and protection.
- develop love of nature: animals.
- identify where animals live and eat.

Moral Value:

Responsibility (diligent, dependable)

"Work hard and cheerfully at whatever you do."

—Colossians 3:23

- state the kinds of foods and tell at what intervals they must

Text:

Everyone must eat. Everyone must eat to grow. Everyone must eat to be healthy. Everyone must eat to work. Everyone must eat to learn. Everyone must eat to play.

Oral Comprehension Questions:

1. Why does your body need food?
2. What would happen if someone did not eat enough food?
3. What would happen if someone ate too much food?
4. When should we eat food?
5. What foods do you like to eat?
6. What foods do you dislike?

WEDNESDAY: Word Recognition

Objective

On Wednesdays the children will use contextual cues to identify missing words.

Preparation

For teaching using the Literacy Ladder:

Before the school day begins, put the cardboard words from Tuesday's lesson on the literacy ladder in the correct order of the sentences. Take away two words from each sentence and place them on a lower rung of the ladder. Leave a space in the sentence where the words are missing. In order to make the activity more challenging, include an extra word that would not be correct.

For teaching using the Blackboard:

Before the school day begins, write two of the sentences from the story on the blackboard. Erase two words from each sentence. Draw a line in the space of the missing words. Write the deleted words in a box next to the sentences. In order to make the activity more challenging, include an extra word that would not be correct.

Lesson Notes

Revision

Hand out the books. Have the children take turns quietly reading the story to the child seated next to them.

Problem

Explain that the sentences are missing some of the words. Ask the children to help find the missing words.

Hypothesis

Using a pointer, read the sentences together stopping where a word is missing. Ask the children if they know which word is missing. Ask them to tell how they know. Do they know which letter the missing word begins with? If they are not able to identify the missing word, then they may look at the sentences in their books.

Analysis

Ask different children to find the missing words for each sentence from the list of words. Place or write the words in the correct space in the sentence. Ask them to tell why the extra word is incorrect.

Synthesis

Once all of the words have been replaced, read the sentences together. Don't forget to use a pointer!

Evaluation

Ask individuals to use the pointer to read the sentences.

3. Where does the spider lay its eggs? What do spiders eat?
4. Where does the chicken lay its eggs? What do birds eat?
5. Where does the fish lay its eggs? What do fish eat?
6. What are some other animals that hatch from eggs?
7. Why does an egg need to hatch in its own time by itself?

Everyone Must Eat

Pages: 93-100

Subject:

Science (Health Education)

Content Objectives:

The pupil will be able to:

- state the disadvantages of overfeeding and underfeeding.

Content Objectives:

The pupils will be able to:

- state, appreciate and develop skills in animal care and protection.
- develop love of nature: animals

Text:

Can you guess what is inside each egg?
Here is an egg. What's inside? A chick is inside. Here is an egg. What's inside? A snake is inside. Here is an egg. What's inside? A spider is inside. Here is an egg. What's inside? A fish is inside. Here is an egg. What's inside? A lizard is inside. Here is an egg. What's inside? An insect is inside. Can you identify each of the eggs?

Oral Comprehension Questions:

1. What are the animals in the story that hatch from eggs?
2. How is each egg distinct? How is each egg similar?

THURSDAY: Syllables

Objective

On Thursdays the children will analyze words by breaking them into syllables.

Preparation

For teaching using the Literacy Ladder:

Before the school day begins, write four multisyllabic words on cardboards. You will need scissors.

For teaching using the Blackboard:

Before the school day begins, write four multisyllabic words on the blackboard.

Lesson Notes

Revision

Hand out the books. Have the children take turns quietly reading the story to the child seated next to them.

Problem

Explain that the words need to be divided into syllables.

Hypothesis

Read the words and ask the children to hypothesize by showing on their fingers the number of syllable breaks of each word.

Research

Together, read and analyze the list of words. Have the children clap while reading each syllable. Don't forget to use the pointer! Ask them if their hypotheses were correct.

Analysis

For teaching using the Literacy Ladder:

Have individuals read each word and indicate where you should cut the words into syllables. Place the syllables in order on the ladder.

For teaching using the Blackboard:

Ask the children to tell you the syllables for each word. Write each syllable.

Synthesis

Read the words with pauses between syllables. Then read the words quickly without syllable breaks. Don't forget to use a pointer!

Evaluation

Call on individuals to read and clap the words with syllable breaks.

FRIDAY: Activity

Choose an activity to do from the possible unit activities in the Teacher's Guide. Follow the instructions.

Oral Comprehension Questions:

1. Show on your fingers how many dogs she saw.
2. Show on your fingers how many pigs she saw.
3. Show on your fingers how many chickens she saw.
4. Show on your fingers how many cows she saw.
5. Show on your fingers how many chicks she saw.
6. Why weren't there any baby chicks?
7. How many baby chicks do you think there will be when the eggs hatch?

What's Inside?

Pages 76-92

Subjects:

Science (Environmental Education)

Citizenship (Moral Education)

How Many? Pages: 65-75

Subjects:

Science (Environmental Education)

Citizenship (Moral Education)

Content Objectives:

The pupils will be able to:

- state, appreciate and develop skills in animal care and protection.
- develop love of nature: animals

Text:

My name is To. I see many animals. I see one cow. I see two goats. I see three dogs. I see four pigs. I see five chickens. How many baby chicks do you see? I see zero baby chicks! The baby chicks haven't hatched yet!

Ìbà m̀ t̀wòḡḡ àḡwà'ànḡ!

mu yì m̀b̀or̀è

Text:

I help you. You help me. We help each other. Helping is fun!

Oral Comprehension Questions:

1. What does it mean to cooperate?
2. How do we help our friends?
3. How do we help our parents?
4. How do we help our brothers and sisters?
5. How do we help our families?
6. How do we help our teachers?
7. How do we help our communities?
8. Who else could we help?
9. Why do you think it is fun to help others?
10. Why do you think it is important to help others?
11. What are some ways that our community cooperates?
12. What might happen if we do not cooperate?

6. How is the way animals cry different than the way people talk?
7. Can you imitate the cry of different birds?

Helping is Fun!

Pages: 58-64

Subject:

Citizenship (Civics)

Content Objectives:

The pupils will be able to:

- please people by doing good things.
- inculcate virtues of obedience, honesty, truthfulness, and kindness.
- practice certain ethical values of the society: love, obedience, honesty, truthfulness.

"Help each other be loving and good."

—Hebrews 10:24

ndâ

àlèṅ

Content Objectives:

The pupils will be able to:

- state, appreciate and develop skills in animal care and protection.
- develop love of nature: animals
- identify where animals live and eat.

Text:

Crying like a goat. Crying like a lion. Crying like a cat. Crying like a bird. Crying like a frog. Crying like a dog. Crying like a cow. Crying like a bat.

Oral Comprehension Questions:

1. What were the animals in the story?
2. How many animals were there?
3. Can you imitate the cry of the different animals?
4. Where do each of the animals live and what do they eat?
5. Are the cries of baby animals different than the cries of their parents? Demonstrate.

3. Which instruments make high sounds?
Which instruments make low sounds?
Which instruments make loud sounds?
Which instruments make soft sounds?
4. What are other things that make similar sounds?
5. What kind of musical instrument would you like to play?
6. Listen. What sounds do you hear right now?
7. How is hearing important?
8. If someone was not able to hear, how would they adapt so that he could communicate? What would he need to do to avoid danger?

Crying

Pages: 47-57

Subjects:

Science (Environmental Education)

Citizenship (Moral Education)

àkaṅè

àntòò òsyê

Instrumental Sounds

Pages: 40-46

Subject:

Science (Health Education)

Content Objective:

The pupils will be able to:

- identify the five senses of the body and their uses (focus on hearing).

Text:

The sound of a bongo drum. The sound of a drum. The sound of a gong. The sound of a guitar.

Oral Comprehension Questions:

1. What instrumental sounds were mentioned in the story?
2. What are other musical instruments?

Ask the following questions:

How many animals with four legs are there?

How many animals with two legs are there?

How many animals with zero legs are there?

How many animals are there all together?

How many animals with two legs and zero legs are there all together?

How many more animals with four legs than two legs are there?

How many less animals with two legs than zero legs are there?
